Abstract (en)

In the new global discourse tolerance has become a central issue for in various countries. These findings have significant implications for the understanding of how learning strategies in teaching tolerance in the Qur'an Surat al-Kafirun. In addition, forms of learning strategies to strengthen diversity. Different methods have been proposed to classify tolerance. This study uses a qualitative approach, with the type of case studies, data collection techniques with document analysis. This research approach uses phenomenology, research methods namely qualitative. In this study, case study was identified as Indonesian high school education. As for the results of the study showed two forms of tolerance strategies

interactive and dialogic learning.

Keywords (en)

diversity, high school students, tolerance-based learning strategies
